

# Fed Challenge Competition Team

## OVERVIEW

The UNCW Fed Challenge is a competition in which a team of three to five undergraduate students learn how the Federal Reserve System conducts monetary policy. The students apply that knowledge to create a 15-minute presentation based on current and projected financial, economic, and inflationary trends and recommend corresponding monetary policy actions. They present in front of a panel of judges, after which there is a Q&A session.

### When?

- Spring Semester: meetings every other Wednesday at 5pm
- Fall Semester: meetings every Wednesday at 5pm

## SOME FACTS

- All students in the Cameron School of Business are encouraged to join
- Possibility to receive course credit for participation.
- Typically, teams travel to a host university to compete

---

Throughout the spring and fall, some students who do not wish to be a part of the presentation team itself help with research and presentation preparation.

---

It is recommended that students have taken:

- ECN 324 (Financial Markets and Institutions)
- ECN 322 (Intermediate Macroeconomics)
- ECN 432 (Seminar in Advanced Open Economy Macroeconomics)

\*However it is not a requirement\*
